For planting 2,500 balsatrees and thereby offsetting

200 TONS OF CO2 EMISSIONS

By offsetting through the Growing Trees Network Foundation and the Wawazonia Project, you support a carbon offset project that can reduce greenhouse gas emissions, halt deforestation in the Amazon, and promote development in the local indigenous Shuar communities. In addition to offsetting 200 tons of CO2 (40 tons/year from 2023-28), planting 2,500 trees helps to protect 3 hectares of primary rainforest in the Amazon.
