

Biodiversity Forest Certificate

Biodiversity forests in Denmark are planted in collaboration with Naturplant.dk

Updated the xx of xxx 20xx

Biodiversity forests are granted status as permanent and contributes to:

- Planting of 100% native species.
- Natural wild vegetation on parts of the areas, light open nature, lakes etc.
- Planting of species matching the existing species in the area so plant- and wildlife spreads into the new area.
- Reduced tillage where possible.

A HUGE thank you for your biodiversity effort to:
