# Mixed Forestry Certificate: Pastaza-region, the Amazon

A mix of native timber and balsa trees in Ecuador are planted in collaboration with SHBnature & FUNDECOIPA.

Issued the xx of xxx 20xx

A mix of native timber and balsa trees in Ecuador can contribute to:

- Effective CO<sub>2</sub>-storage and in time -storage in tree products, which preserves the CO<sub>2</sub>-effect.
- Ensure the biodiversity in the Amazon and create new habitats for plants and animals.
- Restore destroyed rainforest areas and prevent illegal woodcutting.
- Create sustainable development and forest management with the locale Shuarindians.
- Support the way of life and existence of the locale Shuarindians.

Thank you *company name*

For donating 2,500 trees to Mixed Forestry near 6 villages in the Pastaza-region, Ecuador

The trees help to protect 1 hectare of primary rainforest in the Amazon.
